Learning Objectives

1. Understand the central principles of homeopathy based on "the law of similars" and "the law of minimum dose".
2. Describe the regulatory framework for homeopathic drug products.
3. Identify commonly used homeopathic medicines and their corresponding uses in oncologic palliative care.
4. Compare the similarities and differences in symptom sensations, modalities, and concomitants of homeopathic medicines applied in oncologic palliative care.
5. Evaluate the clinical evidence of homeopathic medicines used as complementary therapies for cancer and treatment-related symptoms.
6. Evaluate simple individualized homeopathic regimens for oncologic palliative care.

Target Audience: Pharmacists | Activity Type: Knowledge-Based

The University of the Pacific, Thomas J. Long School of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This program has been accredited for up to 2.0 contact hours (0.2 CEUs) for pharmacists and is numbered 0006-0000-25-001-H99-P.

Disclaimer: This activity has been supported by an unrestricted educational grant from Boiron, USA. The company played no role in the development of this CE activity.

Program Requirements

Participants must 1) read the learning objectives and faculty disclosures; 2) view the educational activity; 3) complete the post-test (score 70% or higher) and evaluation form directly after the activity, and 4) provide your date of birth (MM/DD) and NABP number, in order to receive credit. All credit information will be uploaded into CPE monitor within 30 days.
